Description

1. Create (or open) any trip page.
2. Create 3 todo nodes.
3. Mark status as “Done” for two of them and “To do” for the last one.

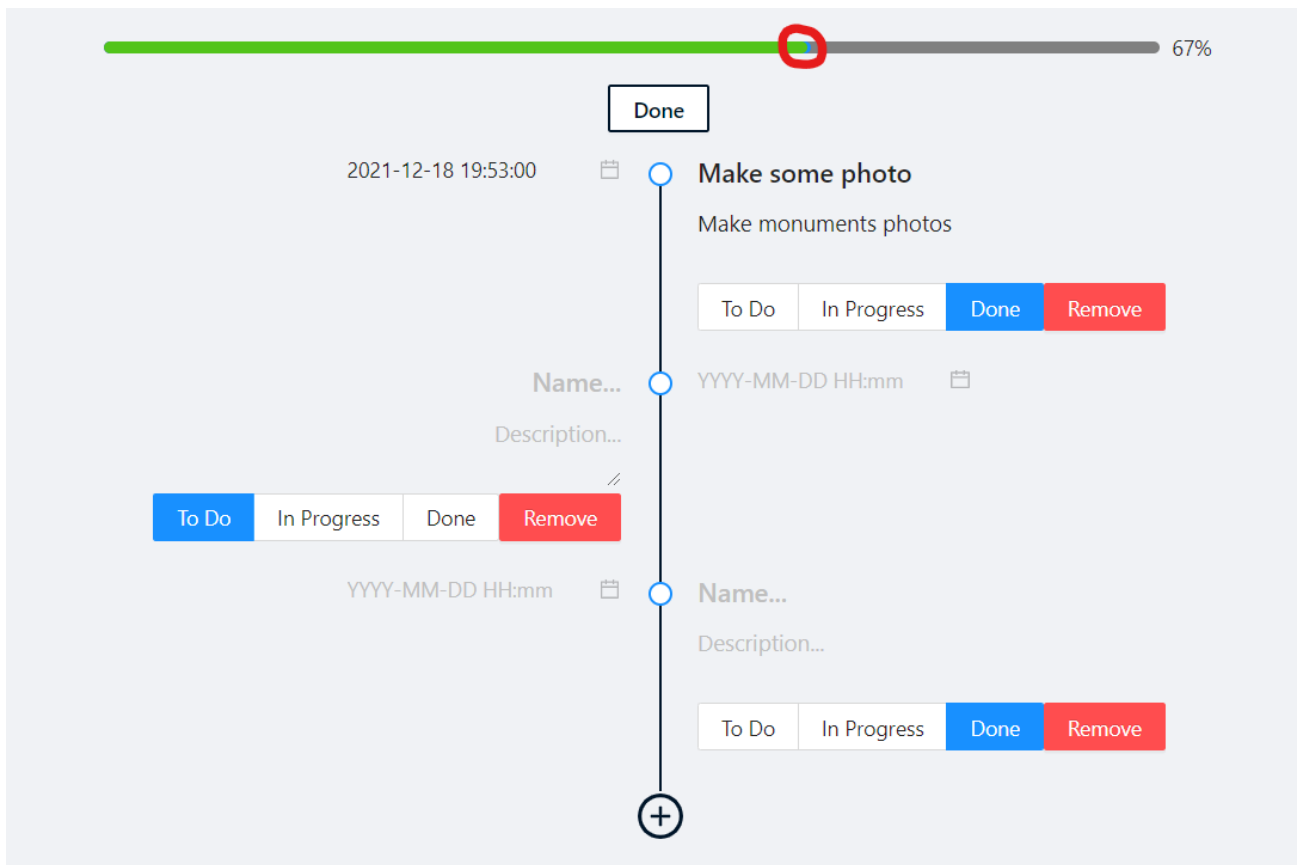

Bug: the progress bar shows little blue line that implies that we should have some todo nodes with “In progress” status, but in this scenario we don’t have such nodes.

That bug is hard to get, because it happens only in one case scenario: user have to create 3 todo nodes and select status of two of them as “*Done*” and for the last one status have to be “*To do*”. In any other cases it seems to work exactly as it should.

Description

1. Create (or open) any trip page.
2. Create any to do node.
3. Change screen width to 540px or less.

Bug: the todo nodes buttons look offset horizontally for such small resolutions.

Description

1. Create (or open) any trip page.
2. Set any date in trip description form.

Bug: the trip dates should have some logical limitation, user can't set trips for next century, or set trip duration for at least more than 10 years.
